***Allowable Subject Matter***

Claims 1-37 are allowed.

The following is an examiner's statement of reasons for allowance: the subject matter of the present invention is related to a system for reducing a bit error in a transmitted signal by determining optimal operational parameter and/or slicing point. with respect to claims 1, 7, 13 and the corresponding dependent claims, the claims are allowed, because Eliezer doesn't teach the steps that includes looking up in a table and processing phase value and peak for determining the optimal slicing point as recited in the claims. With regard to claim 18..the step recited for selecting operational parameter by comparing signal parameter to operational parameter is not taught by prior arts of record. With regard to claims 24 and 32, the steps described for establishing and determining operational parameter and slicing point between a first and second station including all the limitation as described is not disclosed in the prior arts of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel D. Abebe whose telephone number is 571-272-7615. The examiner can normally be reached on monday-friday.
